

COMPOSITE DECK PAVER

Luxury this sophisticated is visible immediately. Our cutting edge composite technology utilizes recycled materials to give VAST® Composite Deck Pavers a look and feel not achieved with traditional composite lumbers. There is nothing quite like VAST deck pavers — the most revolutionary, socially responsible technology paired with expert craftsmanship and sumptuous luxury. So, why not make the most of your deck?

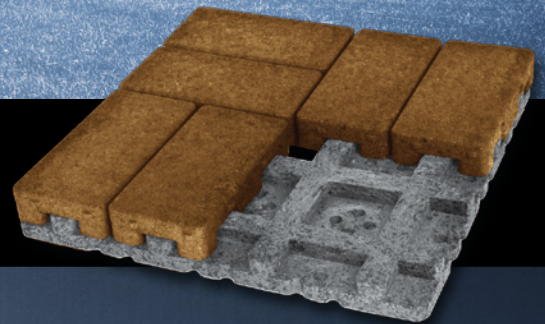

The point when a deck becomes a sanctuary.

Luxury at its most responsible.

Every aspect of our composite deck pavers is earth friendly. Manufactured using a zero-scrap, zero-pollution process, VAST deck pavers are environmentally sound from cradle-to-cradle. And, made from up to 95% recycled materials (including scrap tires and recycled plastics), you can take comfort that this is luxury with a conscience.

Make the most of your deck.

Truly maintenance-free.

Our composite pavers let you spend time enjoying your deck, not working on it. There is no staining, painting, sealing or treatment required. There are no fasteners to work loose and no splinters; your feet will thank you. Unlike composite lumber, our deck pavers completely resist mold and mildew and will not require frequent cleanings. After all, you work hard. Don't spend your precious free time working on your deck.

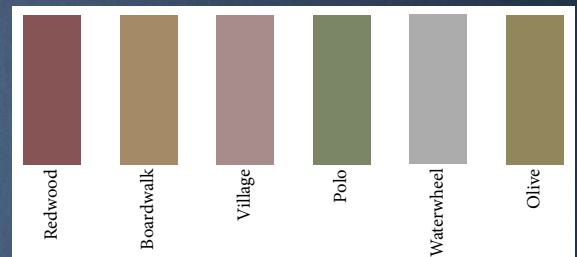

The finest decks taken further.

Enjoy the unique beauty created from a deck made from composite pavers. Our pavers use a patented grid system with integrated water drainage to make installation to a deck subfloor simple and durable.

Paver Size: 2.9" x 5.9"
Grid Size: 11.8" x 11.8"
Total Height: 1.6"

Have the only deck of its kind.

Our pavers are available in several brilliant UV resistant colors. Like our colors, satisfaction with your deck will not fade. Mix and match colors and patterns to create a design that is truly your own.
